

## **NIMBUS ASSEMBLY / NIMBUS COUPLER / NIMBUS SPACER**

### **Introduction**

Thank you for purchasing the Harmonic Resolution Systems Nimbus Assembly, Nimbus Spacer, or Nimbus Coupler. When used properly, they will give you many years of superior musical or video signal reproduction. The HRS Nimbus Products are designed to significantly reduce the negative impact of air and structure-borne vibration on your audio or video component performance. The HRS Nimbus Products are also a perfect match for the HRS Isolation Base and Damping Plates. While the Nimbus Products significantly reduce air-borne vibration by eliminating bottom panel resonance, the Damping Plates work to control top panel resonance and the HRS Isolation Bases or Rack System significantly reduce the harmful effects of structure-borne vibration.

### **Safety Instructions**

**IMPORTANT!**

Do not place any tall objects on the Nimbus Products. A tall object is any object that has a height greater than its own width or length. The object may become unstable and tip over.

Do not place the Nimbus Products over ventilation holes of any electronic component. The ventilation holes will be blocked and the internal operating temperature of the component will be increased.

### **Setup Instructions**

The HRS Nimbus Coupler should be placed directly on the shelf supporting your component. HRS recommends using a pattern of at least three HRS Nimbus Couplers to support a component. If the component is larger trying four or five Nimbus Couplers will often improve performance further. The bottom chassis (not the feet) of the component is then placed in direct contact with the HRS Nimbus Couplers to control bottom panel resonance. Moving the couplers in small increments to find optimal performance for a specific component chassis, based on listening tests, is often beneficial. The HRS Nimbus Spacer is used if additional height is required of the Nimbus System. Use two Nimbus Couplers with each Nimbus Spacer. One Nimbus Coupler is placed one on each side of the HRS Nimbus Spacer. One of the HRS Nimbus Couplers is in contact with the shelf and the other is in direct contact with the bottom chassis of the component. The HRS Nimbus Spacer is between the two HRS Nimbus Couplers to provide stiffness, mass, and the desired support height. The HRS Nimbus Assembly is a bonded version of the Nimbus Coupler and Nimbus Spacer and can not be taken apart.

### **Care and Maintenance**

The HRS Nimbus Products are very low maintenance items that will provide many years of trouble free performance by applying these basic care instructions.

Clean the HRS Nimbus Products using a lint-free soft (non-abrasive) cloth. Use a damp cloth with water or mild soap if required. Do not spray with or immerse in water.

### **Warnings!**

Do not place objects with sharp or pointed feet directly on the Nimbus Products as they may cause nicks, scratches or tear the custom polymers used in the Nimbus Products.

Do not use an abrasive cleaner or abrasive sponge to clean the Nimbus, as they may scratch the metallic surface.

Do not wash with any solvent based cleaning solutions.

## Warranty

### Limited Five-Year Warranty

Harmonic Resolution Systems warrants to the purchaser that each Nimbus and Nimbus Coupler is free of manufacturing defects for a period of five (5) years from the date of purchase. This warranty is subject to the following conditions and limitations.

1. A copy of the original purchase receipt from a certified Harmonic Resolution Systems authorized retailer is used to verify the date of original purchase and ownership.
2. This warranty is void and inapplicable if the product has been handled other than in accordance with the instruction specified within this document, abuse or misused, damaged by accident or neglect or in being transported, or the defect is due to the product being tampered with, modified or repaired by anyone other than Harmonic Resolution Systems.
3. Warranty does not cover normal recommended care and maintenance.
4. Harmonic Resolution Systems shall not be responsible in any way for consequential or indirect damages or liabilities resulting from the use of the product covered herein or resulting from any breach of this warranty or any implied warranty relating to said product.

During this period, Harmonic Resolution Systems will repair or replace any defective components free of charge. A Return Authorization Number (RA Number) is required before any product is returned to Harmonic Resolution Systems for any reason. This number must be visible on the exterior of the shipping container(s) for Harmonic Resolution Systems to accept the return.

Units shipped to Harmonic Resolution Systems without a visible RA Number on the exterior of the shipping container(s) are subject to be returned to the sender, freight collect.

Units to be repaired by Harmonic Resolution Systems must be sent shipping and insurance prepaid by the original purchaser in the original packaging material. A returned product should be accompanied by a written description of the defect. Repaired units will be returned by Harmonic Resolution System shipping and insurance prepaid.

All other warranties or conditions either written or implied are void.

(MADE IN USA)

All Harmonic Resolution Systems Inc. products are 100% Made In The United States of America by skilled craftsmen using only the finest materials and our personal dedication to the highest workmanship standards.
